

One of Quebec's finest gem of a resort!

Renowned as a leader within the region, Hôtel Tadoussac aims at becoming *the* ecotourism destination in the Province of Quebec by implementing and developing tools that will facilitate and integrate eco-management practices within its daily activities. Eco-management is an integral part of the hotel's mission. It is a priority in regards to the health, security, personal development and well-being of its guests and associates. Hôtel Tadoussac is proud to invest and commit to environmental conservation with a view to developing a sustainable society, by ensuring to:

- Meet and exceed our guests' and associates' needs with a view to implementing sustainable development within the company and the community;
- Maintain its activities while fully respecting the environment and implementing pollution preventive measures;
- Implement concrete measures to maximize reduction, reuse, recycling and recovering of waste generated by its activities, while minimizing water and energy consumption;
- Spread the hotel's environmental policy to all guests and associates;
- Inform and heighten personnel awareness to the importance of environmental conservation within their daily professional activities and encourage them in taking initiatives that will decrease the hotel's environmental foot print;
- Encourage associates in pursuing the hotel's environmental policy and applications outside the work place;
- Designate a number of associates responsible for the training of new personnel and updating the environmental policy on an annual basis;
- Set and review the environmental goals and targets in order to continually improve the process;
- Respect environmental rules and regulations along with any other legal requirements required within the hotel industry.

Thank you for your interest and precious cooperation.
